PETRO-VICTORY ENERGY CORP.

Advisory to Reader

Under National Instrument 51-102, Part 4, subsection 4.3 (3)(a), if an auditor has not performed a review of interim financial statements, they must be accompanied by a notice indicating that the financial statements have not been reviewed by an auditor.

The accompanying unaudited interim financial statements of the Company have been prepared by, and are the responsibility of, the Company's management.

The Company's independent auditor has not performed a review of these financial statements in accordance with standards established by the Canadian Institute of Chartered Professional Accountants for a review of interim financial statements by an auditor.

Petro-Victory Energy Corp.
Notes to Consolidated Financial Statements
(Unaudited – See Advisory to Reader)
Three Months Ended March 31, 2020

1. GENERAL INFORMATION

Petro-Victory Energy Corp. and its subsidiaries (“Petro-Victory” or the “Corporation”) are engaged in petroleum and natural gas exploration and other energy activities in Latin America. The Corporation is domiciled in the BVI and maintains its United States (“US”) headquarters and registered office at 5070 Mark IV Parkway, Fort Worth, Texas. The Corporation’s shares are traded on the Toronto Venture Exchange (“TSX-V”) under the symbol VRY.

The financial statements were authorized for issuance by the Corporation’s Board of Directors on July 13, 2020.

2. BASIS OF PREPARATION

Statement of Compliance

The financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board and interpretations of the IFRS Interpretations Committee.

Going Concern and Uncertainties

These consolidated financial statements (the “financial statements”) have been prepared on the basis of accounting principles applicable to a going concern, which assumes that the Corporation will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business. The Corporation incurred comprehensive losses of (\$544,174) and (\$339,597) for the quarters ended March 31, 2020 and 2019, respectively. As of March 31, 2020, the Corporation had cash of \$12,715, an accumulated deficit of (\$73,297,310), and a working capital deficiency of (\$2,503,959). Through March 31, 2020 the Corporation has recorded no revenues from operations.

In addition, early in 2020 there was a world-wide outbreak of a novel coronavirus (Covid-19) which has impacted the global economy and capital markets. This, combined with extreme volatility in global oil commodity prices exacerbated by OPEC, represents a material uncertainty that may cast significant doubt about the Corporation’s ability to continue as a going concern. Both matters increase the complexity of estimates and assumptions used to record reserve estimates, decommissioning costs, and to measure share-based compensation expense and the fair value of warrants.

The ability of the Corporation to continue as a going concern and meet its commitments as they become due is dependent on continued support from key creditors and lenders, the Corporation’s ability to achieve profitable operations, and obtaining the necessary debt and equity financing required to execute its business plans. If the going concern assumption were not appropriate for these financial statements, material adjustments might be necessary to the carrying values of assets and liabilities, reported expenses and the financial statement classifications and presentation.

Basis of Measurement

The financial statements have been prepared on the historical cost basis except as otherwise noted.

Petro-Victory Energy Corp.
Notes to Consolidated Financial Statements
(Unaudited – See Advisory to Reader)
Three Months Ended March 31, 2020

2. BASIS OF PREPARATION (continued)

Functional and Presentation Currency

These financial statements are presented in United States dollars, which is both the functional and presentation currency. Unless otherwise indicated, all “dollar” amounts or references to “\$” refer to United States dollars. References to “CDN \$” are to Canadian dollars.

Significant Estimates and Management Judgements

The timely preparation of financial statements in accordance with IFRS requires that management make estimates, assumptions and use judgement regarding the measured amounts of assets and liabilities at the date of the financial statements and the reported amounts of expenses during the reporting period. Such estimates relate primarily to unsettled transactions and events as of the date of the financial statements. Accordingly, actual results may differ from estimated amounts as future confirming events occur. The following discussion relates to amounts determined by management which required significant estimation and/or judgement.

Management judgement is required in determining the functional currency that represents the economic effect of underlying transactions, events and conditions. The United States dollar is selected as the Corporation’s functional currency as it is the currency of the primary economic environment in which the Corporation operates. The Corporation’s funds from financing and the majority of its expenditures are denominated in United States dollars.

Significant estimation is involved in determining the fair value of the derivative warrant liability associated with debt financings. The Corporation uses the Black-Scholes model, which requires the use of estimation and assumptions for key inputs, to calculate the fair value.

Significant management judgement is required in determining the provision for deferred income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain. The Corporation has not recognized a benefit for the net deferred tax asset created from its non-capital losses and capital losses carried forward due to the uncertainty of realization of such amounts.

The calculation of stock-based compensation expense is subject to uncertainty as the key assumptions used in the stock-based compensation calculation are based on estimated volatility and estimated forfeiture rates for stock options that will not vest.

The application of the Corporation’s accounting policy for Exploration and Evaluation (“E&E”) expenditures requires judgment in determining whether it is likely that future economic benefit exists when activities have not reached a stage where technical feasibility and commercial viability can be reasonably determined. Factors such as drilling results, future capital programs, future operating expenses, as well as estimated reserves and resources are considered. In addition, Management uses judgment to determine when E&E assets are reclassified to PP&E. In making this determination, various factors are considered, including the existence of reserves, and whether the appropriate approvals have been received from regulatory bodies and the Corporation’s internal approval process.

Natural gas and crude oil assets are grouped into cash generating units (“CGUs”) identified as having largely independent cash flows and are geographically integrated. The determination of the CGUs was based on management’s interpretation and judgement. The recoverability of development and production asset carrying values is assessed at the CGU level. The asset composition of a CGU can directly impact the recoverability of the assets included therein.

Petro-Victory Energy Corp.
Notes to Consolidated Financial Statements
(Unaudited – See Advisory to Reader)
Three Months Ended March 31, 2020

2. BASIS OF PREPARATION (continued)

Significant Estimates and Management Judgements (continued)

Provisions are recorded for the future decommissioning and restoration of the Corporation's exploration and evaluation and production assets and infrastructure at the end of their economic lives. Management uses judgment to assess the existence and to estimate the future liability. The actual cost of decommissioning and restoration is uncertain and cost estimates may change in response to numerous factors including changes in legal requirements, technological advances, inflation and the timing of expected decommissioning and restoration. In addition, Management determines the appropriate discount rate at the end of each reporting period. This discount rate is used to determine the present value of the estimated future cash outflows required to settle the obligation and may change in response to numerous market factors.

3. SIGNIFICANT ACCOUNTING POLICIES

Principles of consolidation

The financial statements include the accounts of the Corporation and its wholly owned subsidiaries, as follows: Petro Victory Energy Service Company ("PV Service Company"), a Texas company; Pirity Hidrocarburos, SRL ("PHSRL"), a Paraguayan company; Petro-Victory, LLC, a Texas limited liability company; Universal Geophysics, LLC, an inactive Texas limited liability company; and Petro-Victory Energia Ltda, a Brazilian company. Subsidiaries are entities over which the Company has control. Subsidiaries are consolidated from the date of acquisition of control and continue to be consolidated until the date that there is a loss of control. All intercompany balances and transactions are eliminated on consolidation.

Interests in joint arrangements are classified as either joint operations or joint ventures, depending on the rights and obligations of the parties to the arrangement. Joint operations arise when the Corporation has rights to the assets and obligations for the liabilities of the arrangement.

Business combinations

Acquisitions of subsidiaries and businesses are accounted for using the acquisition method. The purchase price used in a business combination is based on the fair value at the date of the acquisition. The acquiree's identifiable assets, liabilities and contingent liabilities that meet the conditions for recognition under IFRS 3, *Business Combinations*, are recognized at their fair values at the acquisition date. All acquisition costs are expensed as incurred. The interest of non-controlling shareholders in the acquiree, if any, is initially measured at the non-controlling shareholder's proportion of the net fair value of the assets, liabilities and contingent liabilities recognized or at the fair value of the non-controlling interest. Increases or decreases in the Corporation's ownership interest while retaining control is a capital transaction.

Cash equivalents

The Corporation considers all highly liquid instruments with original maturities of three months or less on the date of purchase to be cash equivalents. At March 31, 2020 and December 31, 2019, the Corporation did not have any cash equivalents.

Petro-Victory Energy Corp.
Notes to Consolidated Financial Statements
(Unaudited – See Advisory to Reader)
Three Months Ended March 31, 2020

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Foreign currency translation

The United States dollar is the functional and presentation currency of the Corporation and its subsidiaries. In the event the accounts of the Corporation's subsidiaries have a functional currency different from the Corporation's presentation currency, the transactions and balances are translated into the Corporation's presentation currency at period-end exchange rates for assets and liabilities, and using average rates over the period for revenues and expenses. Translation gains and losses relating to the foreign operations are recognized in other comprehensive income ("OCI") as a cumulative translation adjustment.

When the Corporation disposes of an entire interest in a foreign operation or loses control, joint control, or significant influence over a foreign operation, the foreign currency gains or losses accumulated in OCI related to the foreign operation are recognized in net loss. When the Corporation disposes of part of an interest in a foreign operation that continues to be a subsidiary, a proportionate amount of gains and losses accumulated in OCI is allocated between controlling and non-controlling interests.

Transactions in foreign currencies are translated to the respective functional currencies at exchange rates in effect on the dates of the transactions. Monetary assets and liabilities that are denominated in foreign currencies are translated into the functional currency at the rates of exchange in effect at the period-end date. Any gains or losses are recorded in the Consolidated Statement of Operations and Comprehensive Loss.

Income taxes

As a Foreign Reporting Issuer, the Corporation is generally exempt from all provisions of the United States Internal Revenue Code. In addition, the Corporation is generally exempt from all provisions of the Income Tax Act of the BVI, including with respect to all dividends, interests, rents, royalties, compensation and other amounts payable by the Corporation to persons who are not persons resident in the BVI. Certain subsidiaries of the Corporation are subject to taxation in the United States, Brazil and Paraguay.

Income tax expense comprises current and deferred income taxes. Income tax expense is recognized in the consolidated statements of operations and comprehensive loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity.

Current income tax is the expected tax payable on the taxable income for the period, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous periods.

Deferred income tax is recognized using the liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred income tax is not recognized on the initial recognition of assets or liabilities in a transaction that is not a business combination. In addition, deferred income tax is not recognized for taxable temporary differences arising on the initial recognition of goodwill. Deferred income tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date.

Deferred income tax assets and liabilities are offset if there is a legally enforceable right to offset, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

Petro-Victory Energy Corp.
Notes to Consolidated Financial Statements
(Unaudited – See Advisory to Reader)
Three Months Ended March 31, 2020

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Income taxes (continued)

Deferred income tax assets are recognized to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilized. Deferred income tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Property, Plant and Equipment and Exploration and Evaluation Assets

Recognition and measurement

Exploration and evaluation (“E&E”) assets - E&E costs, including the costs of acquiring licenses, farming into or acquiring rights to working interest and directly attributable general and administrative costs, initially are capitalized either as tangible or intangible E&E assets according to the nature of the assets acquired. The costs are accumulated in cost centers by well, field or exploration area pending determination of technical feasibility and commercial viability.

When E&E assets are determined to be technically feasible and commercially viable (generally upon assignment of proved and probable reserves), the accumulated costs are transferred to property, plant and equipment (“PP&E”).

When E&E assets are determined not to be technically feasible and commercially viable or the Corporation decides not to continue with its activity, the unrecoverable costs are charged to the consolidated statements of operations and comprehensive loss as exploration costs.

E&E assets are allocated into CGUs and assessed for impairment when they are transferred to PP&E or in any circumstances where sufficient data exists to determine technical feasibility and commercial viability, and facts and circumstances suggest that the carrying amount exceeds the recoverable amount.

Development and production (“D&P”) assets - Items of property, plant and equipment, which include natural gas and crude oil development and production assets, are measured at cost less accumulated depletion and depreciation and accumulated impairment losses. D&P assets are grouped into CGUs for impairment testing.

When significant parts of an item of PP&E, including natural gas and crude oil interests, have different useful lives, they are accounted for as separate items (major components).

Gains and losses on disposal of an item of PP&E are determined by comparing the proceeds from disposal, net of transaction costs with the carrying amount of PP&E and are recognized net within the consolidated statements of operations and comprehensive loss.

Subsequent costs - Costs incurred subsequent to the determination of technical feasibility and commercial viability and the costs of replacing parts of property, plant and equipment are recognized as PP&E only when they increase the future economic benefits embodied in the specific asset to which they relate. All other expenditures are recognized in the consolidated statements of operations and comprehensive loss as incurred. Such capitalized PP&E generally represent costs incurred in developing proved and/or probable reserves and bringing in or enhancing production from such reserves. The carrying amount of any replaced or sold component is de-recognized. The costs of the day-to-day servicing of PP&E are recognized in the consolidated statements of operations and comprehensive loss as incurred.

Petro-Victory Energy Corp.
Notes to Consolidated Financial Statements
(Unaudited – See Advisory to Reader)
Three Months Ended March 31, 2020

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Property, Plant and Equipment and Exploration and Evaluation Assets (continued)

Recognition and measurement (continued)

Depletion and depreciation - The net carrying value of D&P assets is depleted using the units-of-production method by reference to the ratio of production in the period to the related proved plus probable reserves, taking into account estimated future development costs necessary to bring those reserves into production. Future development costs are estimated by taking into account the level of development required to produce the reserves.

Proved and probable reserves are estimated using independent reserve engineer reports and represent the estimated quantities of natural gas, crude oil and natural gas liquids which geological, geophysical and engineering data demonstrate with a specified degree of certainty to be recoverable in future years from known reservoirs and which are considered commercially producible.

Reserves may be considered commercially producible if management has the intention of developing and producing them and such intention is based upon:

- i) A reasonable assessment of the future economics of such production;
- ii) A reasonable expectation that there is a market for all or substantially all the expected natural gas and crude oil production; and
- iii) Evidence that the necessary production, transmission and transportation facilities are available or can be made available.

Corporate and other property and equipment

Other property and equipment are stated at historical cost less accumulated depreciation. Depreciation is recognized on a double-declining basis at an annual rate of 20%.

Impairment

Financial assets

A financial asset is assessed at each reporting date for being credit-impaired or having significantly increased credit risk since initial recognition; if so determined, an estimated loss allowance is measured at an amount equal to the lifetime expected credit losses ("ECL"). Lifetime ECLs are a probability-weighted estimate of credit losses from all possible default events over the expected life of a financial asset. Credit losses are measured as the PV of all expected cash shortfalls relative to the carrying value of the financial asset. The ECLs are discounted at the effective interest rate.

Non-financial assets

The carrying amounts of the Corporation's non-financial assets, other than E&E assets and deferred income tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the recoverable amount of the asset is estimated. E&E assets are assessed for impairment when they are reclassified to PP&E, and also if facts and circumstances suggest that their carrying amount exceeds the recoverable amount. Deferred income tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Petro-Victory Energy Corp.
Notes to Consolidated Financial Statements
(Unaudited – See Advisory to Reader)
Three Months Ended March 31, 2020

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Impairment (continued)

For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets. The recoverable amount of an asset or a CGU is the greater of its value in use and its fair value less costs to sell.

E&E assets are allocated to related CGUs when they are assessed for impairment, both at the time of any triggering facts and circumstances as well as upon their eventual reclassification to D&P assets. An impairment loss is recognized if the carrying amount of an asset or its CGU exceeds its estimated recoverable amount. Impairment losses recognized in respect of CGUs are allocated first to reduce the carrying amount of any goodwill allocated to the units and then to reduce the carrying amounts of the other assets in the unit (group of units) on a pro-rata basis.

Impairment losses recognized in prior years are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount.

An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depletion and depreciation or amortization, if no impairment loss had been recognized.

All impairment losses are recognized in the consolidated Statements of Operations and Comprehensive Loss.

Provisions

A provision is recognized if, as a result of a past event, the Corporation has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows using the risk-free rate of interest.

Decommissioning obligations

The Corporation's activities give rise to dismantling, decommissioning and site disturbance remediation activities. Provisions are made for the estimated cost of site restoration and capitalized in the relevant asset category.

Decommissioning obligations are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the period-end date. Subsequent to initial measurement, the obligation is adjusted at the end of each period to reflect the passage of time and changes in the estimated future cash flows underlying the obligation. The increase in the provision due to the passage of time is recognized as finance costs whereas increases or decreases due to changes in the estimated future cash flows are capitalized. Actual costs incurred upon settlement of the decommissioning obligations are charged against the provision to the extent the provision was established.

Financial instruments

Financial instruments are recognized when the Corporation becomes a party to the contractual provisions of the instrument. Financial assets are derecognized when the rights to receive cash flows from the assets have expired or have been transferred and the Corporation has transferred substantially all risks and rewards of ownership. Financial instruments are recognized initially at fair value plus, for instruments not at fair value through profit or loss, any directly attributable transaction costs.

Petro-Victory Energy Corp.
Notes to Consolidated Financial Statements
(Unaudited – See Advisory to Reader)
Three Months Ended March 31, 2020

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Subsequent to initial recognition, non-derivative financial instruments are measured as described below:

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss (“FVTPL”) are financial assets held for trading or financial assets designated as such by Management on initial recognition. Such assets are held for trading if they are acquired principally for the purpose of selling in the short-term. These assets are initially recognized, and subsequently carried, at fair value, with changes recognized in the consolidated statement of operations and comprehensive loss. Transaction costs are expensed. The Corporation has designated the derivative warrant liability at FVTPL.

Financial assets and liabilities at amortized cost

Financial assets and liabilities at amortized cost are non-derivative financial instruments with fixed or determinable payments that are not quoted in an active market. They are included in current assets or liabilities, except for maturities greater than 12 months after the end of the reporting period. These are classified as non-current assets or liabilities. Financial assets and liabilities at amortized cost are initially recognized at fair value plus transaction costs and subsequently carried at amortized cost using the effective interest method. The Corporation has designated cash, accounts payable, accrued liabilities, and long-term debt at amortized cost.

Equity Instruments

Financial instruments issued by the Corporation are classified as equity only to the extent that they do not meet the definition of a financial liability or asset. Common shares, warrants and share purchase options are classified as equity. Incremental costs directly attributable to the issue of common shares and share options are recognized as a deduction from equity, net of tax effects if any.

In the case where common shares and warrants are issued as part of a unit offering, the Corporation uses the residual value method in valuing the offering’s shares and warrants. The residual value method first allocates value to the more easily measurable component based on fair value and the residual value, if any, to the less easily measurable component. The fair value of common shares issued in private placement is determined to be the more easily measurable component and are valued at the trading price on the date of closing. The balance, if any, is allocated to the attached warrants.

Loss per share

Loss per share is calculated using the weighted-average number of common shares outstanding during the periods. Diluted loss per share is determined by calculating the loss attributable to common shareholders after adjusting the weighted average shares outstanding for the effect of dilutive instruments. Diluted loss per share is not presented when it is anti-dilutive in nature.

Share-based compensation

The Corporation accounts for share-based compensation using the Black-Scholes option-pricing model to determine the fair value of stock options on grant date using various estimates including expected share price volatility, the risk-free interest rate and the expected term of the options. Share-based compensation is measured at fair value on the grant date and expensed over the vesting period of each tranche with a corresponding increase to contributed surplus. Consideration paid upon the exercise of stock options, together with corresponding amounts previously recognized in contributed surplus, is recorded as an increase to share capital. The amount recognized as expense is adjusted for an estimated forfeiture rate for options that will not vest, which is adjusted as actual forfeitures occur, until the shares are fully vested.

Petro-Victory Energy Corp.
Notes to Consolidated Financial Statements

Three Months Ended March 31, 2020

4. NEW AND FUTURE ACCOUNTING STANDARDS, AMENDMENTS AND INTERPRETATIONS

New standards adopted in 2020:

Amendments to IFRS 3 Business Combinations

Amendments to IFRS 3, Business Combinations assist in determining whether a transaction should be accounted for as a business combination or an asset acquisition. It amends the definition of a business to include an input and a substantive process that together significantly contribute to the ability to create goods and services provided to customers, generating investment and other income, and it excludes returns in the form of lower costs and other economic benefits.

These amendments are effective for reporting periods beginning on or after January 1, 2020 and did not have a material impact on the consolidated financial statements.

5. PROPERTY, PLANT AND EQUIPMENT

Cost	D&P
Expenditures incurred	\$ 1,575,000
Asset retirement obligations recorded in 2019 (Note 6)	155,263
As at March 31, 2020 and December 31, 2019	
	\$ 1,730,263

In fiscal 2019, the Corporation completed the acquisition from ENGEPEP of several farm-in participation interests in four oilfield concessions in the Potiguar Basin, Brazil. Pursuant to the agreement, the Corporation was required to enter into a Joint Operating Agreement with the farmee and will be obligated to fund its share of minimum work commitments in future periods (Note 14). Depletion, depreciation and amortization will commence once the Corporation is entitled to its proportionate share of the revenues and expenditures from the joint operation, which will occur in the first half of 2020.

Included in accounts payable is \$740,030 (December 31, 2019 - \$752,835) owing related to the acquisition of the farm-in interests.

Petro-Victory Energy Corp.
Notes to Consolidated Financial Statements
(Unaudited – See Advisory to Reader)
Three Months Ended March 31, 2020

6. DECOMMISSIONING OBLIGATIONS

The Corporation's decommissioning obligations result from its ownership interests in petroleum and natural gas assets, including well sites, facilities, and gathering systems. The total decommissioning obligations are estimated based on net ownership interests, estimated costs to reclaim and abandon these wells and facilities, and the estimated timing of the costs to be incurred in future years. The total undiscounted amount of the estimated cash flows required to settle its decommissioning obligations is \$185,000 (2018 - \$nil) which will be settled over the operating lives of the underlying assets, estimated to occur between 2027 and 2040. A risk-free rate of 1.15% (2018 – nil) and an inflation rate of 0.15% (2018 – nil) were used to calculate the decommissioning liability.

	March 31, 2020	December 31, 2019
Balance, beginning of period	\$ 155,263	\$ -
Additions (Note 5)	-	155,263
Revisions (Note 5)	-	-
Accretion expense	446	-
Balance, end of period	\$ 155,709	\$ 155,263

7. DEPOSITS

The Corporation is required to place deposits pursuant to farm-in and other acquisition agreements. The following deposits have been paid in accordance with the agreed terms of the respective contracts, which are in the regulatory approval process.

	March 31, 2020	December 31, 2019
Imetame	\$ 219,886	\$ 219,886
Lagoa Parda	702,935	702,935
	\$ 922,821	\$ 922,821

The deposits are non-interest bearing and are only refundable if the farmee fails to satisfy conditions precedent in the underlying agreements or the acquisition is not approved by the respective regulatory bodies.

8. SHARE CAPITAL

Authorized

The Corporation's authorized share capital consists of an unlimited number Class A Common Stock, no par value, an unlimited number of Class B Restricted Voting Shares, no par value, immediately convertible to Class A shares, and an unlimited number of Preferred Shares, no par value, which can be issued in one or more series with the terms for each series determined by the Board of Directors.

Share Consolidation

On January 27, 2020, the Corporation completed a 1:40 share consolidation. All classes of stock, stock options, and warrants were affected and all comparative numbers for 2019 have been restated.

Three Months Ended March 31, 2020

8. SHARE CAPITAL (continued)

Share Issuance

On March 12, 2020, the Corporation completed a common share issuance of 41,667 shares at a price of CDN \$0.80. Proceeds from the issuance were \$25,000.

Stock Options

The Corporation's Stock Option Plan permits the granting of options to purchase Common Shares to directors, officers, employees and consultants of the Corporation and its subsidiaries. On March 13, 2020, pursuant to approval obtained at the November, 2019 Annual General Meeting, the Corporation adopted a 20% Stock Option Plan, which allows for the granting of stock options for the purchase of up to 20% of the outstanding shares of the Corporation.

Additionally, options may not be granted to any one person, any one consultant or any persons performing investor relations duties in any twelve-month period which could, when exercised, result in the issuance of shares exceeding 5%, 2% or 2%, respectively, of the issued and outstanding shares of the Corporation. All options granted under the Plan shall expire no later than the tenth anniversary of the date the options were granted.

The exercise price of the options is to be determined by the Board of Directors, subject to any applicable Exchange approval, at the time any option is granted. In no event shall such exercise price be lower than the exercise price permitted by any applicable Exchange. Vesting of the options is at the discretion of the Board of Directors. A summary of the changes in options is presented below.

	March 31, 2020		December 31, 2019	
	#	Weighted average exercise price (CDN)	#	Weighted average exercise price (CDN)
Outstanding, beginning of period	295,906	\$ 2.00	295,906	\$ 2.00
Awarded March 30, 2020	1,480,750	.80	-	-
Outstanding, end of period	1,776,656	1.00	295,906	2.00
Exercisable, end of period	295,906	\$ 2.00	295,906	\$ 2.00

The details of the options outstanding at March 31, 2020 are as follows:

Options outstanding	Weighted average exercise price (CDN)	Options exercisable	Weighted average years to expiry
1,776,656	1.00	295,906	6.02

Petro-Victory Energy Corp.
Notes to Consolidated Financial Statements
(Unaudited – See Advisory to Reader)
Three Months Ended March 31, 2020

8. SHARE CAPITAL (continued)

Stock Options (continued)

The fair value of the options granted in fiscal 2017 was determined using the Black-Scholes option pricing model with the following key assumptions and inputs: (1) exercise price of \$0.05(CDN); (2) volatility of 89.52%; (3) risk-free rate of 1.51%; (4) term of ten years; (5) forfeiture rate of 0%; and (6) expected dividend yield of 0%. The estimated fair value was calculated at \$0.21 (CDN) per option.

For the three months ended March 31, 2020 and 2019, the Corporation recognized \$0 and \$2,939, respectively, of share-based compensation expense that has been included in payroll and related charges in the Statements of Operations and Comprehensive Loss.

The new options were granted at the end of Q1 of 2020 and none had vested by March 31, 2020. Accordingly, the fair value of the 2020 options will be computed during the second quarter of 2020 and initial accretion calculated.

9. LONG TERM DEBT AND DERIVATIVE WARRANT LIABILITY

Loans

	March 31, 2020	December 31, 2019
Balance, beginning of period	\$ 3,305,702	\$ 1,280,089
Loan proceeds	-	2,000,000
Transaction costs incurred	-	(19,355)
Accretion of transaction costs	13,586	44,968
Balance, end of period	\$ 3,319,288	\$ 3,305,702

On August 28, 2018, the Corporation entered into a credit facility with PPF9, LLC (“PPF”) providing for up to \$10 million of loans to be collateralized by shares of the subsidiary in Brazil and guaranteed by the corporate parent. The initial Loan Agreement (the “Loan”) provides for a \$4 million loan consisting of two advances: 1) the sum of \$1,400,000 which was advanced on August 29, 2018; and 2) the remaining \$2,600,000 to be advanced at a mutually agreeable date thereafter. The \$1,400,000 advance is collateralized by the four Brazilian oil fields disclosed in Note 5. The Loan is signed with Petro-Victory, LLC as borrower, as the LLC owns the Brazilian subsidiary and is also guaranteed by the corporate parent. The Loan terms provide for interest at an annual rate of 9% payable quarterly, a maturity date 36 months after the initial close, and bonus warrants that permit the holder to purchase up to 750,000 common shares (pro-rata at 3 warrants per dollar drawn on the loans) of the Corporation at a price of CDN \$2.00 per share for a period of three years from receipt of funding. Warrants to purchase 105,000 shares, on a one-for-one basis, vested with the funding of the initial \$1,400,000 advance.

On November 19, 2019, the Corporation announced the closing of a secured debt financing from 579 Max Ltd. totaling \$2,000,000 to be used for acquisitions and provide general working capital. The financing is subject to the same terms and conditions as the PPF9 facility above, and will similarly bear interest payable quarterly at the rate of 9% per annum and will be due with a balloon payment at the end of 36 months. 579 Max Ltd. received 657,500 warrants to purchase an equal number of common shares over the term of the loan at an exercise price equal to CDN \$2.00.

At March 31, 2020, the Corporation was unable to make the quarterly interest payments but received waivers from each lender.

Petro-Victory Energy Corp.
Notes to Consolidated Financial Statements
(Unaudited – See Advisory to Reader)
Three Months Ended March 31, 2020

9. LONG TERM DEBT AND DERIVATIVE WARRANT LIABILITY (continued)

Legal costs and other financing fees incurred to secure the credit facilities are recorded as a reduction of the outstanding loan balances in the year incurred and are amortized as accretion expense over the term of the respective loans.

Warrants (adjusted to reflect January, 2020 share consolidation);

	March 31, 2020		December 31, 2019	
	#	Weighted average exercise price (CDN)	#	Weighted average exercise price (CDN)
Outstanding, beginning of period	762,500	\$ 2.00	105,000	\$ 2.00
Issued	-	-	657,500	2.00
Outstanding, end of period	762,500	\$ 2.00	762,500	\$ 2.00
Exercisable, end of period	762,500	\$ 2.00	762,500	\$ 2.00

The details of the warrants outstanding at March 31, 2020 are as follows:

Warrants outstanding	Weighted average exercise price (CDN)	Warrants exercisable	Weighted average years to expiry
762,500	2.00	762,500	2.46

The number of common shares to be issued on the exercise of warrants and the price per share are fixed; however, since the functional currency of the Corporation and the loans are US dollar denominated, the warrants do not meet the requirements of an equity instrument. Based on IFRS requirements and specifically IAS 32, the warrants are instead classified as derivative financial liabilities. Accordingly, the value of the warrants is to be measured at their fair value on initial recognition and subsequent measurement.

For valuation purposes, the Corporation used the Black-Scholes method to determine the fair value at March 31, 2020 to be \$271,900 and December 31, 2019 to be \$299,100. The net change in the fair value of the derivative liability is credited to the Statement of Operations and Comprehensive Loss.

10. SEGMENTED DATA

The Corporation operates in one industry, being the exploration and development of oil and gas resources, but several geographic locations.

Segmented data for select financial assets and liabilities is noted in the table on the following page:

11. FINANCIAL INSTRUMENT RISKS AND CONCENTRATIONS

The Corporation's financial instruments consist of cash, accounts payable, accrued liabilities, long-term debt and derivative warrant liability.

Fair value

The fair values of cash, accounts payable and accrued liabilities approximate their carrying values due to their short-term nature. The carrying value of long-term debt approximates fair value and is recorded at amortized cost. The fair value of the derivative warrant liability is measured on initial recognition and each subsequent reporting date using Level 3 hierarchy inputs.

Risks associated with financial assets and liabilities

The Corporation's activities are exposed to a variety of financial risks such as credit risk, market risk and liquidity risk that arise as a result of its activities. Management has primary responsibility for monitoring and managing financial instrument risks under the direction of the Board of Directors, which has overall responsibility for establishing the Corporation's risk management framework.

Market risk

Market risk is the possibility that changes in foreign exchange rates, interest rates, access to capital, or the prices of crude oil and natural gas products will adversely affect the value of assets, liabilities and expected future cash flows.

Petro-Victory Energy Corp.
Notes to Consolidated Financial Statements
(Unaudited – See Advisory to Reader)
Three Months Ended March 31, 2020

11. FINANCIAL INSTRUMENT RISKS AND CONCENTRATIONS (continued)

Commodity price risk

Commodity price risk is the risk that future cash flows will fluctuate as a result of changes in commodity prices. Commodity prices for petroleum and natural gas are impacted by world and continental/regional economic and other events that dictate the level of supply and demand (note 15). Fluctuations in these prices may negatively impact the Corporation's ability to economically develop its resource properties and execute its business plans as access to capital could be restricted.

Credit risk

The Corporation's financial instruments exposed to concentrations of credit risk consist primarily of cash, which is on deposit with reputable financial institutions. There has been no history of credit losses.

Foreign exchange risk

Foreign currency risk is the risk that the fair value of the Corporation's financial assets and liabilities will fluctuate due to fluctuations in foreign exchange rates. The Corporation is exposed to foreign currency risk with respect to cash, accounts payable, and accrued liabilities denominated in Canadian dollars and Brazilian reals. The Corporation does not currently manage currency risk through hedging or other currency management tools.

Liquidity risk

Liquidity risk relates to the risk the Corporation will encounter should it have difficulty in meeting obligations associated with the financial liabilities. Financial liabilities consist of accounts payable, accrued liabilities and long-term debt which are due within one to three years. The Corporation manages its liquidity risk by forecasting cash flow requirements for its planned corporate activities and anticipated investing and financing activities. Management and the board of directors are actively involved in the review, planning and approval of significant expenditures and commitments. Liquidity difficulties would emerge if the Corporation was unable to establish a profitable production base to generate sufficient cash flow to cover both operating and capital requirements and service debt financing arrangements. The Corporation anticipates it will continue to have adequate liquidity to fund its financial liabilities through its future funds from operations and issuance of debt or equity instruments.

The following are the contractual maturities of financial liabilities including expected interest payments at:

March 31, 2020	Contractual cash flows	Less than one year	1 - 3 years
Accounts payable and accrued liabilities	\$ 1,197,340	\$ 1,197,340	\$ -
Accrued liabilities	1,386,805	1,386,805	
Long term debt	4,128,280	-	4,128,280
	\$ 6,712,425	\$ 2,584,145	\$ 4,128,280
<hr/>			
December 31, 2019	Contractual cash flows	Less than one year	1 - 3 years
Accounts payable and accrued liabilities	\$ 1,042,650	\$ 1,042,650	\$ -
Accrued liabilities	1,229,555	1,229,555	
Long term debt	4,128,280	-	4,128,280
	\$ 6,400,485	\$ 2,272,205	\$ 4,128,280

Petro-Victory Energy Corp.
Notes to Consolidated Financial Statements
(Unaudited – See Advisory to Reader)
Three Months Ended March 31, 2020

11. FINANCIAL INSTRUMENT RISKS AND CONCENTRATIONS (continued)

Interest rate risk

Interest rate risk consists of two components:

- (a) To the extent that payments made or received on the Corporation's monetary assets and liabilities are affected by changes in the prevailing market interest rates, the Corporation is exposed to interest rate cash flow risk.
- (b) To the extent that changes in prevailing market rates differ from the interest rate in the Corporation's monetary assets and liabilities, the Corporation is exposed to interest rate price risk.

The Company is exposed to interest rate risk to the extent the changes in market interest rates will impact the Company's cash balances that are at a floating or short-term rate of interest and the long-term debt, which is at a fixed rate of interest. The Corporation does not have any hedging instruments in place at March 31, 2020 nor December 31, 2019 to mitigate this risk.

12. RELATED PARTY TRANSACTIONS AND KEY MANAGEMENT COMPENSATION

Transactions with related parties are incurred in the normal course of business and are measured at the exchange amount which is the amount of consideration established and approved by the related parties. Related party transactions are disclosed below, unless they have been disclosed elsewhere in the financial statements.

For the quarters ended March 31, 2020 and 2019, the Corporation incurred \$3,000 each quarter in office and administration charges provided by a Company controlled by a significant shareholder. Included in accounts payable is a balance owing of \$37,843 (December 31, 2019 - \$34,843) in respect of these amounts.

For the quarters ended March 31, 2020 and 2019, the Corporation incurred \$6,000 each quarter in consulting fees billed by members of management (Country Directors). Included in accrued liabilities is \$48,000 (December 31, 2019 - \$42,000) owing to these individuals.

As at March 31, 2020, there are accrued and unpaid payroll and related charges of \$1,244,784 (December 31, 2019 - \$1,059,289) owing to officers, directors and related party consultants.

During the quarter ended March 31, 2020, certain officers and directors advanced funds to the Corporation in the amount of \$70,000 (2018 - nil). As at March 31, 2020, there are advances owing to related parties of \$110,541 (December 31, 2019 - \$47,152) included in accounts payable and accrued liabilities. During the quarters ended March 31, 2020 and 2019, no interest was charged.

The compensation paid or payable to key management for services is shown below:

	March 31, 2020	March 31, 2019
Salaries and director fees	\$ 243,250	\$ 186,250
Consulting fees	6,000	6,000
Share-based compensation expense	0	2,939
	\$ 249,250	\$ 195,189

Petro-Victory Energy Corp.
Notes to Consolidated Financial Statements
(Unaudited – See Advisory to Reader)
Three Months Ended March 31, 2020

13. CAPITAL MANAGEMENT

The Corporation manages its capital structure and makes adjustments to it, based on the funds available to the Corporation, in order to support its operations. Management does not establish a quantitative return on capital criteria, but rather relies on the expertise of the Corporation's management to sustain future development of the business. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Corporation, is reasonable. The Corporation is not subject to externally imposed capital requirements.

14. COMMITMENTS AND CONTINGENCIES

Canacol Energy Debenture

On June 26, 2014, the Corporation executed a convertible debenture in the amount of \$5,000,000 with Canacol Energy, a related party. On July 25, 2014, the Corporation repaid \$2,500,000 of principal, as well as \$100,000 in interest and debt retirement fees. On October 5, 2015, the Corporation signed an Amendment Agreement providing for repayment of the debenture in a fixed amount of \$2,700,000 including accrued interest from one of two sources: a) from 33% of amounts received under the 3% NPI royalty agreement entered into by the Corporation upon divestiture of its interests in the Pirity Block, Paraguay in fiscal 2014, and/or b) the pass through of amounts received as back costs from any future farm-out partner in the Pirity Block. To date, no pass-through recoveries have been received nor NPI payments. Since the repayment of this obligation is contingent upon the Corporation receiving funds from either of the aforementioned sources, the liability is contingent in nature and not recognized in the accompanying consolidated statement of financial position until such time as the contingencies are satisfied and then only to the extent amounts are received.

Minimum work commitments

Pursuant to farm-in and other acquisition agreements, the Corporation will be obligated to meet minimum work commitments (Note 5) related to exploration and development activities. The Corporation will be required to obtain additional debt or equity financing in 2020 and beyond to fund commitments for future work programs.

Legal claims

The Corporation is party to legal claims and disputes in the normal course of business. The Corporation believes that any liabilities that might arise from such matters, to the extent not provided for, are not likely to have a material impact on the consolidated financial statements. Provisions for claims are recognized when the probable outcome of the matter can be reasonably determined and the amount of the provision can be reasonably estimated.

15. SUBSEQUENT EVENTS

In preparing the financial statements, management has evaluated all subsequent events and transactions for potential recognition or disclosure through the date the financial statements were approved for issuance. No such events occurred.
